

GIS CAREER FORUM

May 22, 2013 Wednesday, Sharjah Women's College-HCT

GISTEC, through TIEM, would like to invite you to the fifth GIS Career Forum, the only career fair dedicated to the Geographic Information Systems (GIS) industry. The event offers the opportunity for students and new graduates to meet and network with organizations using GIS in the UAE.

There is a huge demand for GIS professionals by many companies and government organizations, generally in the Middle East and especially in the UAE. However, due to lack of awareness among UAE Nationals about the technology and the career opportunities in GIS, very few of them occupy GIS or GIS-related positions today.

GIS Career Forum aims to address this issue and provides a venue for Nationals to learn more about GIS technology and the opportunities and skills needed for a GIS career.

The event will feature introductory workshop on ArcGIS software, presentations about GIS technology and careers, and an exhibition by government organizations about their GIS implementation programs and GIS career opportunities.
