# GISTEC TRAINING CENTER

## January -February - March - 2012

### KEY

#### ArcGIS Desktop

Designed to help you master critical GIS skills and be productive right away with the ArcGIS 10 tools for visualizing, analyzing, and managing geographic data.

#### ArcGIS Server

These courses are for those who set up and manage ArcGIS Server implementations or who want to develop custom ArcGIS server applications.

#### Geodatabase

These courses are for those who are responsible for developing workflows and management strategies for ArcSDE geodatabases. Courses include using and connecting to the multiuser geodatabases, as well as techniques and strategies needed for ArcSDE technology.

#### Customized

Customized courses are those courses that are not provided by ESRI. These courses are made specially to meet the training requirements of the customers.

#### Partner Course

These courses are for those who need to integrate their current Esri GIS workflows with other third part applications used for different sectors.

#### Mobile GIS

These courses will help you learn creating mapping applications that will improve field operations and make more informed business decisions.
