Training Courses Calendar
October 2010 – March 2011

Introduction

Successful organizations know that investing in staff development is an effective strategy to reduce costs, streamline operations, and improve business results. Benefits of GIS training include:

- Increased in productivity and efficiencies in GIS operations, allowing staff to accomplish more with fewer resources
- Prevention of costly mistakes in new GIS implementation and system updates
- Knowledgeable staff better able to recognize opportunities for GIS to help an organization increase operating efficiencies, build its customer base, stay ahead of the competition, and increase revenue.

GISTEC offers instructor-led Esri training courses that teach fundamental GIS technology skills and best practices to accomplish GIS workflows.

The list of scheduled training courses in this brochure has been especially planned to address the diverse range of training needs required by our GIS users from the seven Emirates. This training program is based on the predicted needs of our customers, taking into account their current Esri software licenses, near term known requirements, or training courses already taken.

All training courses will be held either in GISTEC Training Center, Sharjah or GISTEC Training Center, Abu Dhabi.

Updated for ArcGIS 10

Most of the Esri training courses in this brochure will be taught using ArcGIS ١٠ materials.

To ensure that you get the appropriate training for the ArcGIS release that you are using, please always check the class schedule on the GISTEC Training web site. The website schedule should specify which release will be used in a given class.

Register Today!

Classes fill early, so plan ahead. Registration is on a first come, first served basis.

GISTEC Training Center

GISTEC Training Center, located in our offices in Sharjah, is a designated Esri Authorized Learning Center. Since its inception, GISTEC Training Center has trained more than 5,000 individuals from various government agencies and private companies in the UAE and GCC countries.

The training center offers over 200 training courses each year majority of which are introductory and advanced training courses on Esri GIS software. GISTEC Training Center uses current training materials from Esri so students are ensured that they will be taught on the latest software release. Each training course is taught by an Esri authorized instructor and students earn an internationally recognized Esri student certificate on completion of the course.

The training center also provides training courses on remote sensing and photogrammetry (PCI Geomatica), facilities management (ArcFM UT), spatial ETL (SAFE FME), and web-based GIS (Geocortex), among others. For more details visit www.gistec.com/training.
