ArcGIS Server, Customization and Programming

Foundation
The ArcGIS Desktop foundational courses are designed to help you master critical GIS skills and be productive right away with the ArcGIS 10 tools for visualizing, analyzing, and managing geographic data.

GIS Analysis & Extensions

Geodatabase

These courses are for those who are responsible for developing workflows and management strategies for ArcSDE geodatabases. Courses included using and connecting to the multiuser geodatabase, as well as techniques and strategies needed for ArcSDE

technology.

These courses are for those interested in learning best practices for analyzing spatial and attribute data to discover patterns and relationships and solve geographic problems.

These courses are for those who set up and manage ArcGIS Server implementations or who want to develop custom ArcGIS Server applications.

Non-Esri Software

These courses are for those who need to integrate their current ESRI GIS workflows with other third party applications used for different sectors.

All Training Courses are conducted in GISTEC Training Center
1608 Al Batha Tower, 283 Corniche St., PO Box 5026, Sharjah UAE
(Courses may be conducted in Abu Dhabi or in client site
as per request and for a minimum number of students in a class)
